APPLIED MATHEMATICS AND COMPUTATION

VOLUME 32

JOEL K. JOLAYEMI AND JULIO N. BERRETTONI
Multivariate Control Charts: An Optimization Approach to the Effective Use and Measurement of Performance 1

JOEL K. JOLAYEMI AND JULIO N. BERRETTONI
An Optimal Design of Multivariate Control Charts in the Presence of Multiple Assignable Causes 17

K. TENNAKONE AND D. TANTIRIGODA
Periodicity in the Incidence of Filariasis and the Solar Cycle 35

M. A. WOLFE
On Order-Interval Methods for Bounding Zeros of Order Convex Operators 45

RENPU GE
A Parallel Global Optimization Algorithm for Rational Separable-Factorable Functions 61

JOHN CASTI AND KARL SIGMUND
Special Issue on Mathematical Biology: Introduction 73

MICHAEL CONRAD
Physics and Biology: Towards a Unified Model 75

HANS MEINHARDT
Tailoring and Coupling of Reaction-Diffusion Systems to Obtain Reproducible Complex Pattern Formation During Development of the Higher Organisms 103

WILLIAM C. HOFFMAN
The Visual Cortex is a Contract Bundle 137

JOSEPH W.-H. SO AND PAUL WALTMAN
A Nonlinear Boundary Value Problem Arising from Competition in the Chemostat 169

THOMAS L. VINCENT AND JOEL S. BROWN
The Evolutionary Response of Systems to a Changing Environment 185

SABIN LESSARD
The Mathematics of Resource Allocation in Population Biology. I. Interspecific Competition 207

C. CANNINGS AND G. T. VICKERS
Patterns and Invasions of Evolutionary Stable Strategies 227

JOHN H. HOLLAND
Searching Nonlinear Functions for High Values 255
